

Mukta's Projects, Partners and Perspectives

Mukta Foundation is firmly rooted in the concept of collaborating with different strata of the society to bring about a collaborative effort to achieve community care. With this end, Mukta foundation has embarked upon a few projects along with the strategic partnership of non-profits working on different causes and issues. We are deeply indebted to the non-profit organizations who have provided us a chance to partner with them to make our dream a meaningful reality. We are also grateful to all the people who have guided and inspired us all along the project cycle. Mukta is always looking for projects that make an impact. We welcome NGOs, NPOs and individuals who are interested in collaborating with us. To understand our team structure and workflow, [click here](#). If you are interested in starting a project or in becoming a part of a project, contact us. Click on project list below to get an overview of the projects. Projects Mukta foundation strongly believes that a triangular and synergistic partnership between public, private and non-profit sectors is very essential and crucial to create a significant social impact. Today, there exists a kind of hostile and competing mindset among many non-profits/non-government initiatives. Though the pure intention of each organization is to work for a better cause, Mukta believes that the efforts are the most effective when working together. Mukta has been actively seeking for partnership with organizations which share such similar thoughts.
